

Science Week Visitor 3rd & 4th April 2019

It has been Science Week in Beauly Primary and Nursery. As part of that we were lucky to have Dr Evelyn Gray from UHI visit to explain more about what scientists do.

She told us that real scientists need to have good looking, listening and talking skills. They need to ask questions and find answers.

We learned that real scientists wear “white coats.” Eilidh

The coats don't have zips or buttons. “They have poppers.”

Freddie

“So that they can take them off straight away” (if there is a spillage). Archie

Evelyn showed us some bugs encased in acrylic blocks.

Science Week Visitor

3rd & 4th April 2019

We looked at the bugs with magnifying glasses.

“It makes them big.” Chloe

“I counted the legs on the butterfly. It had 6 so it’s an insect.” Owen

“The moth has a silver eye to see in the dark.” Melanie

“I had something like a lobster.” Eva”

“Crab.” Sarah

“It was an insect as it had 6 legs.”
Archie

We then learned how to use a microscope and used it to look at different things.

“It’s small here
but then it was
big.” Jackson

“It was my
hair.” Melanie
